

# Darian Baker

- **Date of birth:** 7th August, 2007
- **Nationality:** Maltese
- **Address:** Triq stiefnu zerafa, Gharghur GHR1231, Malta
- **Phone number:** +356 77096987
- **Email address:** darianbakerbray@gmail.com
- **Web:** darianbaker.eu

## Profile

Hi there! I'm Darian Baker, a junior full stack software developer, and I'm proud to hold this title at just 18 years old.

Most of my experience has come from hands-on projects I've built myself, including websites, game development, app development, and full stack applications. These projects have helped me grow my skills and understand the full development process from start to finish.

If you're interested in learning more or want to connect, feel free to send me a message!

## Work Experience

07/2024 – 09/2024  
Valletta, Malta

### Network Intern MITA (Malta Information Technology Agency)

#### Network Management & Support:

- Monitored and maintained network infrastructure across 10+ government offices and or schools, ensuring 99.9% net uptime
- Diagnosed and resolved 20+ network issues monthly.
- Assisted in upgrading network hardware.

#### Security & Compliance:

- Conducted vulnerability assessments and worked on remediation plans to meet regulatory standards

05/2025 – present  
St Julians, Malta

### Full stack developer GiG

#### Full-Stack Development & Automation:

- Spearheaded development and maintenance of full-stack applications driving automation and configuration across multiple system levels, leveraging robust and scalable software architecture to enhance operational efficiency
- Worked extensively with technologies including Redis, Docker, and the .NET framework lifecycle to build and optimize solutions

#### Process Documentation & Collaboration:

- Delivered consistent flowchart documentation to standardize processes, improve team collaboration within the projects, and accelerate deployment cycles

01/2023 – 05/2025  
Malta

### Freelance Development Freelance Development

#### Project Development & Delivery:

- Delivered 15+ custom software projects for clients across finance using AI, gaming, and retail industries.
- Designed and implemented scalable and robust web applications.
- Integrated APIs and third-party services, enhancing product functionality and user engagement by at a minimum of 25% on each site.

## Education

---

01/2023 – 12/2025

Naxxar, Malta

### A Levels

#### Giovanni Curmi Higher Sixth Form School Malta

- Studied Advanced Computing, diving into programming and problem-solving
- Covered Advanced Pure Mathematics, tackling complex concepts and theories
- Explored Intermediate Physics, learning about the principles that explain how things work
- Studied Psychology, understanding human behavior and mental processes
- Developed skills in English, focusing on communication and analysis
- Learned Systems Of Knowledge, gaining a broad perspective across various subjects

09/2025 – present

Msida, Malta

### Software Development | Bachelors

#### University Of Malta

- Mastered advanced programming, algorithms, and database management, currently ranking amongst the top in my class/
- Developed proficiency in software design, structured development, testing, and agile methodologies through hands-on projects.
